

## Getting started with Prestart within Gearbox

Welcome to Gearbox and Prestart!

There are a few simple steps you need to follow to get Prestart up and running within Gearbox.

**Step one** : First, you need to set up your Prestart users (drivers):

<http://www.gearbox.support/knowledge-base/adding-drivers-to-prestart-in-gearbox/>

**Step two** : You will then need to create your Prestart checklists in Gearbox for your drivers to use: <http://www.gearbox.support/knowledge-base/adding-prestart-checklists-in-gearbox/>

**Step three** : You then need to attach the specific check list to the specific vehicle:

<http://www.gearbox.support/knowledge-base/prestart-checklist/>

**Step four** : Once Prestart is linked, read over integration:

<http://www.gearbox.support/knowledge-base/prestart-integration/>
